ACCC-ESSIBILITY

DESN 445: Phase 2

Pet Licensing Accessibility Beyond ACCC

How might we get pets licensed when their owners can’t access ACCC?

Presented by the Accessibility Team:

Raquel Callele

Ella Jane Eresmas

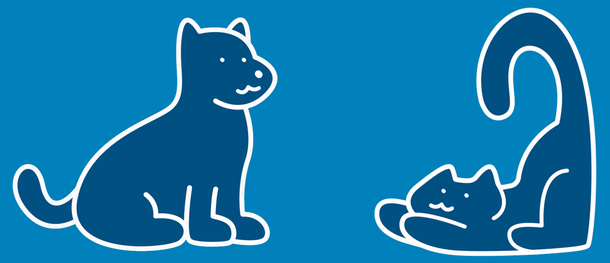
Kelsey Kendrick

Cadence Mutch

Animal Care & Control Centre

Edmonton

Where we started



Phase 1 research established the landscape for pet licencing in Edmonton – who struggles, where the system breaks down, and what residents need to succeed.

Identified Pain Point for Service Delivery of Pet Licencing Accessibility

Frontline Animal Care & Control Centre Staff cannot offer alternative paths for people who can't come in-person or are unable to pay online

Transit Barriers Causing Further Accessibility Issues for Pet Owners

ACCC is only accessible by car or a potentially difficult transit trip – a real obstacle for car-free residents within the City of Edmonton

Document Verification Requires a Paper-First Process

To apply for a reduced rate, Income Assistance applicants must appear in-person to submit documents no digital pathway options currently exist

The Opportunity

1. Pet Licensing is mandatory – but the path to completing it assumes a digital device, digital literacy, and a car/easy access to the ACCC

2. Income Assistance applicants are faced with a document barrier with no straightforward digital workaround

3. Identified Design Opportunity: Redesign what access means so it meets residents in places they already go

“Seems like a lot of work to access.”

“I need clear and accessible information about pet licensing.”

ACCC-ESSIBILITY

Pet Licensing Beyond the ACCC

The Concept

DESN 445: Phase 2

Here’s what we want to tackle:

Challenges

- Getting to ACCC in person
- Accessing assistance
  - General issues
  - Form completion
  - Document scanning/uploading/ verification

Proposed Solution

Enhance the existing service to consistently provide seamless access, assistance, form completion, and document handling in **one integrated experience.**

Partnership Connections

How these two services can improve accessibility of the Pet Licensing service

Digital map & Kiosk Follow-up

Helps users locate accessible EPL branches, understand what to bring, and stay on track throughout the licensing process with follow-up prompts.

CHANNEL Digital

Reference Manual (Staff Focused)

Equips library staff with the guidance needed to assist users at the kiosk — covers special rate eligibility, steps for document scanning, and escalation steps.

CHANNEL Digital Physical

Interactive Kiosk

The primary touchpoint where residents complete the licensing form, submit payment, and receive confirmation — with an income support path built in.

CHANNEL In-Person • EPL Branches

ACCC-ESSIBILITY

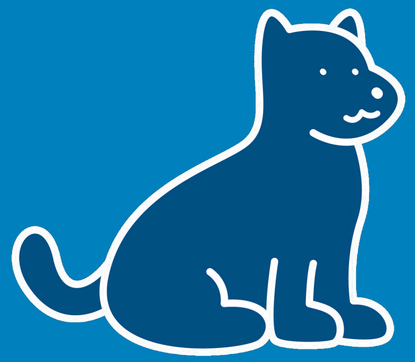
Pre-existing Service: EPL Form Completion Help Session



EPL Form Completion Help Sessions

This pre-existing service is a volunteer program and service at the Edmonton Public Library (EPL) that helps newcomers and others complete government forms. Volunteers assist with digital literacy challenges, focusing on online or paper forms for immigration, employment, and more.

Interactive Pet Licensing Kiosk at Participating EPL Locations

A Self-Service Pet Licensing Kiosk

Located at Edmonton Public Library Branches – so residents can discover, complete, and confirm a pet licence without ever visiting the ACCC

ACCC-ESSIBILITY

Education & Information

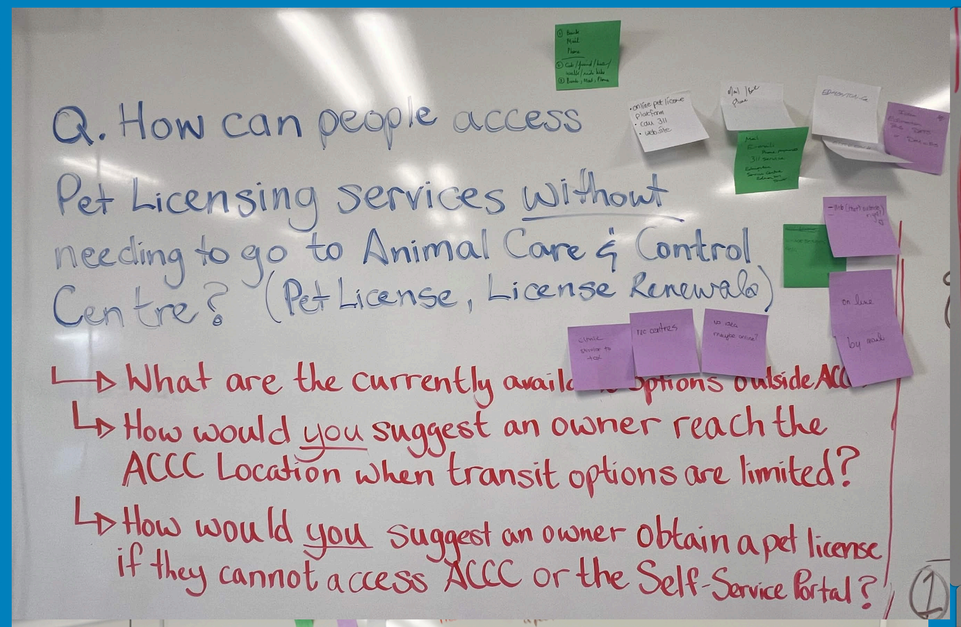
Education as a central theme: make licensing understandable and visible.

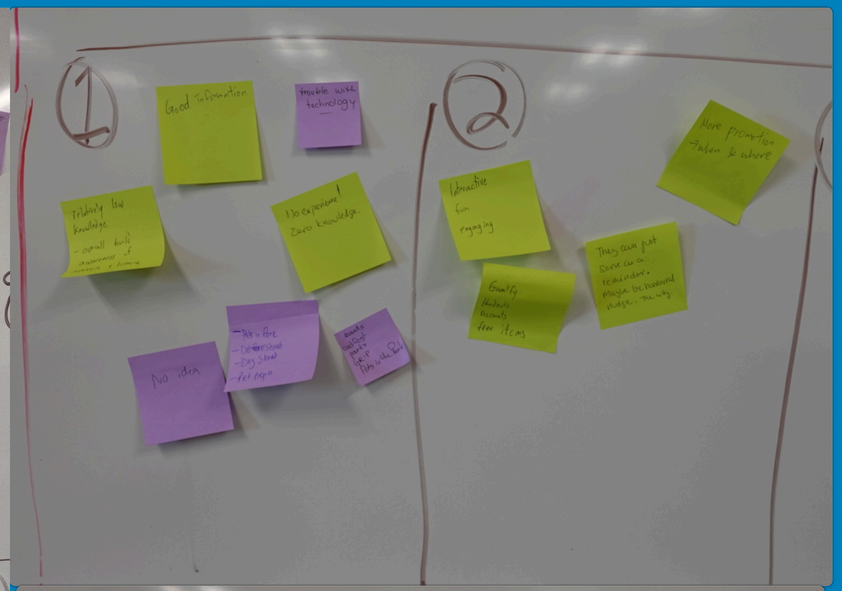
- Use kiosks/staff to educate
- Consider printed resources and “take-home” material at booths.

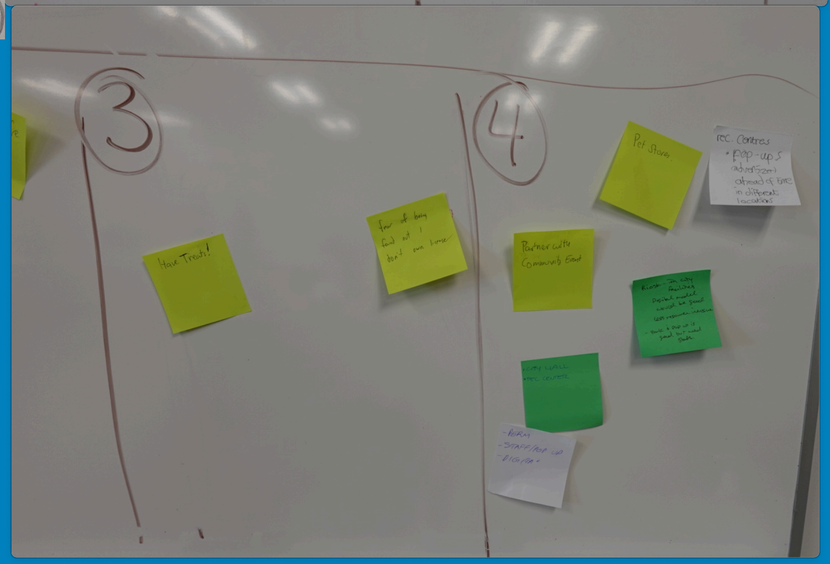
Design Opportunities to Explore:

- On-demand mobility options to get to pet-licensing partner sites.
  - Pet-friendly ride options and clear rules on travelling with pets.
- **<u>Use kiosks/staff to educate:</u>**
  - *How licensing works and why it matters.*
  - *How to book microchips.*
  - *How to access microchip appointments (self-serve, online, or on-site).*

→ Consider providing printed resources & the ability to give users’ “take-home” material at kiosks.



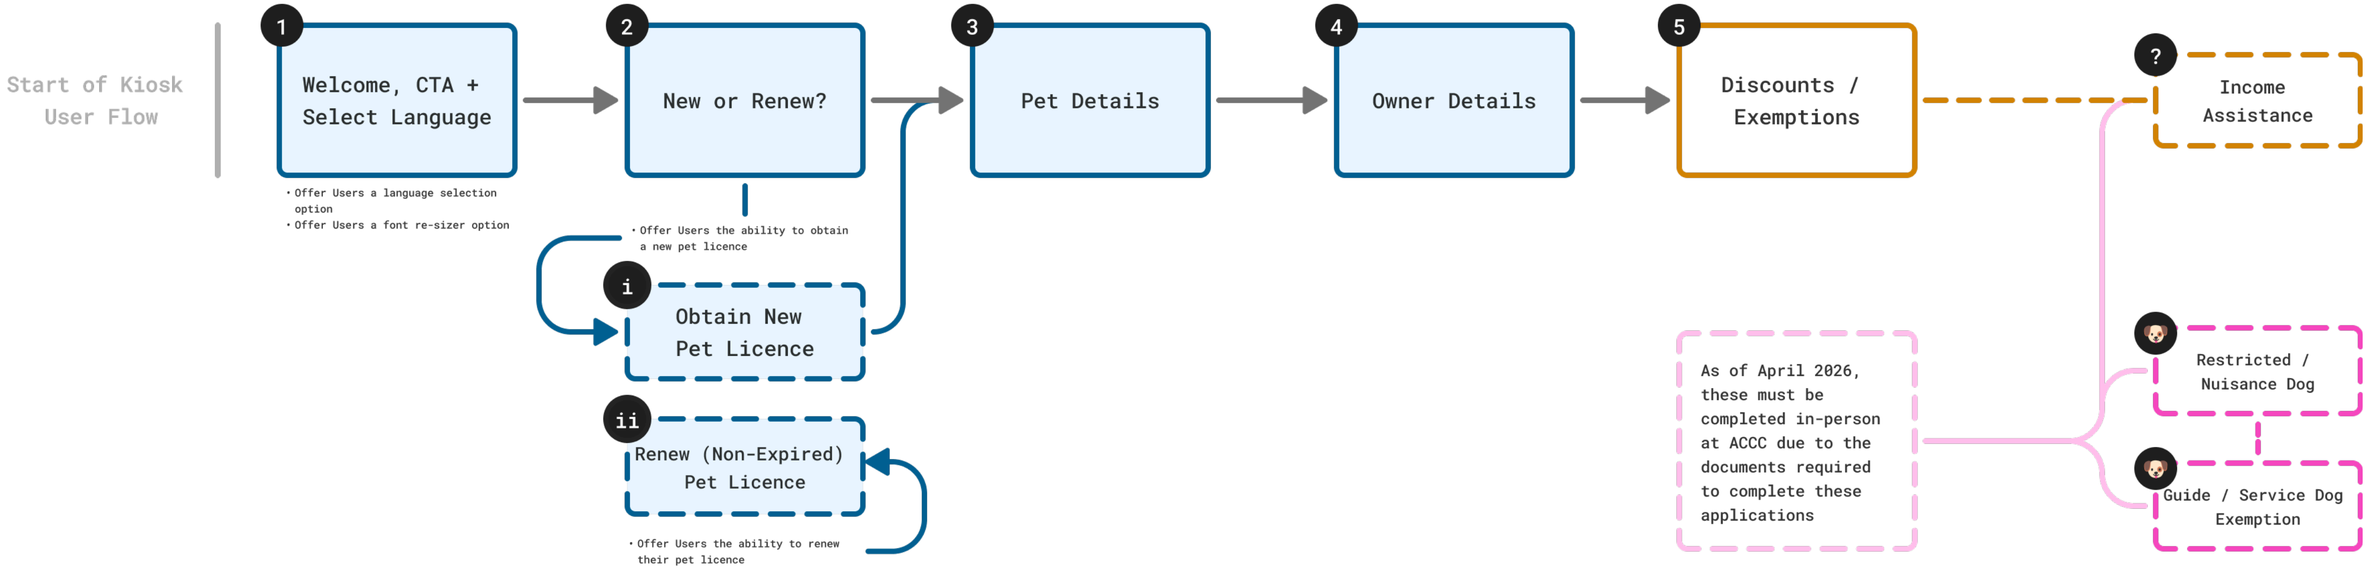




Building the Solution

User Flow for Kiosk

Shared Flow for All Users



Path A - Standard Pet Licensing Process

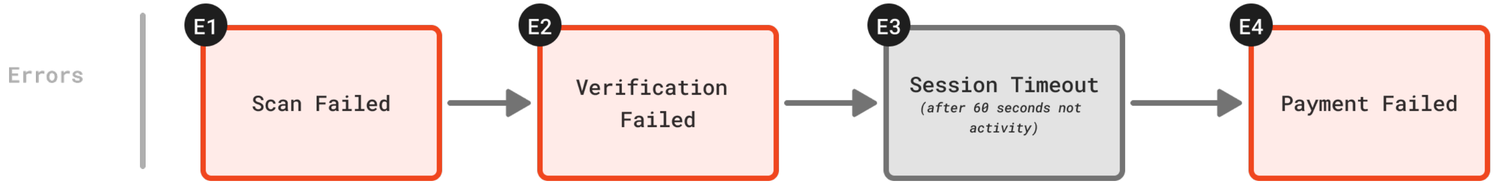
Error & Edge Case States



Implementation Roadmap

Deployment Timeline

Now

Pilot at Stanley A. Milner EPL

- Kiosk Deployed at Downtown EPL Branch
- EPL Staff scan documents using existing branch scanners
- Standard & Income Assistance Applicants are fully supported
- ACCC receives digital portal submissions via the kiosk

5 Years

Network Expansion

- 5+ EPL Branches with kiosk installations & assistance
- Mobile QR Code uploads or phone camera scanning options
- Integration with City of Edmonton Self Service Portal Accounts
- Multi-language support: French, Mandarin, Punjabi, etc.

10 Years+

Integrated Additional Services

- Built-in kiosk document scanner and pet tag engraver
- Additional gameified content
- Integrating other city departments (buy your Valley Zoo membership)
- Proactive licensing reminders via app
- Real-time ACCC queue & micro-chip appointment booking
